(May 17, 2010 Stillwater, OK) – Do you have a newly diagnosed diabetic cat? Jill D. Brunker, DVM, Diplomate ACVIM, Small Animal Internal Medicine, at Oklahoma State University's (OSU) Center for Veterinary Health Sciences, is looking for at least eight newly diagnosed diabetic cats for a clinical trial using a human drug. To qualify for the study, cats must be naïve diabetics and cannot have been treated with any diabetic management modalities.

This novel drug was approved by the FDA for type 2 diabetes therapy in humans and is proving to be a safe and effective treatment. Diabetic cats are very similar to people with type 2 diabetes, and this investigational drug could prove to be equally valuable in the cats' treatment.

All costs related to hospital visits, examinations, diagnostics, and medications will be covered by the clinical trial for the duration of the study (3 months). The management of the cat's diabetes will be at the highest standard of care. Estimated value per patient is $1,250.

For more information, contact the Principal Investigator, Dr. Jill Brunker, at OSU's Center for Veterinary Health Sciences: phone 405-744-7000; fax 405-744-7370; email jill.brunker@okstate.edu .

The Oklahoma State University Center for Veterinary Health Sciences is one of 28 veterinary colleges in the United States and is fully accredited by the Council on Education of the American Veterinary Medical Association. The center's Boren Veterinary Medical Teaching Hospital is open to the public and provides routine and specialized care for small and large animals. It also offers 24 hour emergency care and is certified by the American Animal Hospital Association. For more information, visit www.cvhs.okstate.edu or call (405) 744-7000.
